

USF Human ID 3-D Database and Morphable Faces Release Agreement

Introduction

The US Defense Advanced Research Projects Agency (DARPA) sponsored the Human Identification (HumanID) program. The goal of the HumanID program was to develop new techniques, technology, and algorithms for the automatic recognition of humans. As part of the HumanID program, the University of South Florida (USF) collected a database of 3-D images of human faces. The database is meant to aid research efforts in the general area of developing, testing and evaluating human recognition algorithms. The University of South Florida (USF) has copyright to the collection of 3-D images and serves as Principal Investigator for distribution of the HumanID 3-D database. USF is also responsible for the distribution of the 3D morphable faces created by University of Freiburg using this 3D face database.

Release of the Database

To advance the state-of-the-art in human recognition, the HumanID database and the 3D morphable faces will be made available to researchers on a case-by-case basis. All requests for the USF HumanID 3-D database and the 3D morphable faces must be submitted in writing to the USF Principal Investigator.

To receive a copy of the database, this license agreement **MUST** be reviewed and signed by a person authorized to make legal commitments on behalf of the institution or corporation. We cannot accept licenses signed by students or faculty members any more. **Your institution's legal office must review and execute the license.**

Consent

The researcher(s) agrees to the following restrictions on the HumanID 3-D database and 3D morphable faces:

1. **Redistribution:** Without prior approval from the USF Principal Investigator, the HumanID 3-D database and the 3D morphable faces, in whole or in part, will not be further distributed, published, copied, or disseminated in any way or form whatsoever, whether for profit or not. This includes further distributing, copying or disseminating to a different facility or organizational unit in the requesting university, organization, or company.
2. **Modification and Commercial Use:** Without prior approval from the University of South Florida, the database, in whole or in part, may not be modified or used for commercial purposes.
3. **Requests for the HumanID Database and Morphable Faces:** All requests for the HumanID database and the 3D morphable faces will be forwarded to the USF Principal Investigator.
4. **Publication Requirements:** Those seeking to include renderings of more than 10 images from the USF Human ID 3-D database and 3D morphable faces in reports, papers, and other documents to be published or released must first obtain approval in writing from USF Principal Investigator. In no case should the face images be used in a way that could cause the original subject embarrassment or mental anguish.
5. **Citation/Reference:** All documents and papers that report on research that uses the USF 3-D database faces will acknowledge the use of the database by including an appropriate citation that will be provided upon request by the USF Principal Investigator. All documents and papers that report on research that uses the University of Freiburg 3-D morphable faces will acknowledge the use of the database by including a citation to: V. Blanz, V. and T. A. Vetter, *Morphable Model for the Synthesis of 3D Faces*, SIGGRAPH'99 Conference Proceedings, pp. 187-194, 1999.
6. **Publications to USF:** A copy of all reports and papers that are for public or general release that use the USF HumanID 3-D database must be forwarded immediately upon release or publication to the USF Principal Investigator. In no case should the still frames or video be used in any way that could cause the original subject embarrassment or mental anguish.

A copy of all reports and papers that are for public or general release that use the 3D morphable database must be forwarded immediately upon release or publication to *Thomas Vetter, Graphische Datenverarbeitung; Albert-Ludwig-Universität Freiburg; Georges-Köhler-Allee 52; 79110 Freiburg; Germany.*

7. **Indemnification:** Researcher agrees to indemnify, defend, and hold harmless the University of South Florida and its Board of Trustees, officers, employees and agents, individually and collectively, from any and all losses, expenses,

damages, demands and/or claims based upon any such injury or damage (real or alleged) and shall pay all damages, claims, judgments or expenses resulting from Researcher's use of the HumanID database.

University of South Florida has an export control process in place. If you are outside USA, please answer to the following questions. If approved, only then can we send you the data. Foreign distribution may be restricted.

1. What country will this data be shipped to and used?
2. Who would use this data? Identify names
3. What will this data be used for?

NAME of LEGAL REPRESENTATIVE (in capitals)

SIGNATURE and DATE

NAME of PERSON RECEIVING THE DATA

ORGANIZATION AND ADDRESS (in capitals).

Mail original signed form to USF Principal Investigator:

Sudeep Sarkar,
Computer Science and Engineering,
4202 E Fowler Ave., ENB 118;
